

AAF Fund Utilization report

July 2022 to March 2024

AAF started in 2022 with the aim to support the most critical stakeholder in the civil society - the communities. We believe that people inherently know their needs, their challenges and the solutions that will help them break the cycle of poverty, address the lack of opportunities and resources. We intend to play a supporting role in their story and help unlock and enable whatever they need and together aspire for equity for all.

Fund utilization

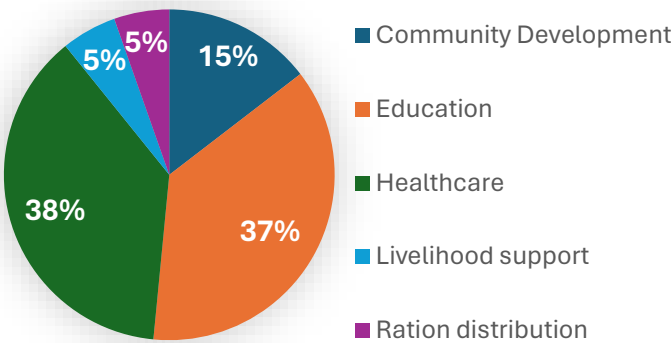

Over the last 1.5 years we have raised INR 23L and disbursed INR 18.5L

As we build on our aspirations, at early stages, we started with supporting people with their immediate need of funds such as for areas like education or healthcare.

	Amount (INR)
Funds Received	23,08,283
Funds Disbursed	18,52,697
Expenses	1,17,490
Unused Balance	3,38,096
Total Utilized	19,70,187

We had the support of 9 funders and were able to support 22 recipients. While most of the recipients were individuals, we did support a few organizations as well. Two of these organizations work in several aspects of community development. The majority of **75% was allocated towards healthcare and education**. The remaining **25% was towards** miscellaneous activities such as **ration distribution, livelihoods support, mental health**.

Summary of funds disbursed

What's next?

We will focus on building strong partnerships with other non-profits to disburse funds through programs that will go beyond immediate support of funds and instead identify ways of creating a long-lasting impact.
